

Members Only Prop Clinic—Survey

Please provide as much information as possible. RPMs at WOT is very important to determining the best propeller for your boat.

Basic Boat Information:

Make: _____

Length: _____

Year: _____

Power (No. & type of engine): _____

Current Prop: _____

Max RPM @ Wide Open Throttle (WOT): _____

To determine WOT, run your vessel up to its normal operating temperature. Then, when safe to do so, run the boat at full throttle. Note the RPM of your engines

What problems, if any, are you experiencing with your propellers now? _____

Are you having any performance issues with your boat? _____

How do you typically use your boat? _____

Is there anything else Brian should know about your boat? _____

Brian's Notes: _____
